# MODELS TAL-450-CS and TAL-750-CS

*InkJet Printer for Dispensers*

## Model TAL-450-CS and TAL-750-CS

If you need to print a date, lot code, or other variable information on a label, prior to it being dispensed, this system was designed for you.

The Smart Jet Inkjet, using trusted Hewlett Packard technology, can be added to the constant speed label dispenser. By utilizing a constant speed dispenser, we eliminate the expensive encoder and the reliability issues that can come with using an encoder. With a color LCD display on the inkjet, inputting information with the wireless keyboard is simple and easy. With the ability to print up to 6 lines at 300x300 DPI, this coder is the solution to your label coding needs.

The Smart Jet Inkjet Printer can be added to the TAL-450-CS, TAL-750-CS, TAL-2100ER, TAL-3100R, TAL-3100T, TAL-3100C, and TAL-3100W.

### Standard Features:

- HP Print Technology
- Print up to 6 lines with a total ½” print height
- Automatic rotation Color LCD display
- Up to 300x300 DPI
- Easy to replace quick dry ink cartridge

### Specifications:

- Electrical Requirements: 110AC
